

What is an EZ Scan® Community?

An EZ Scan Community allows a school district or a sponsoring organization to group EZ Scan subscriptions into one community for easier access and collective data viewing.

How is an EZ Scan® Community created?

School districts or sponsored organizations with two or more EZ Scan schools may become an EZ Scan Community. Fitness Finders® creates the Community and gives an Admin person(s) access to the account. ***There is no extra cost to creating a Community.***

Does the EZ Scan® Community provide school data?

Yes. Several reports are readily available with the click of a button.

- Aggregate data of total miles per school and average mileage per student is available in a printable pdf.
- Customizable stats are available with a spreadsheet.
- Access to individual school accounts. (Only provided to school districts and sponsoring organizations with permission to access that data.)

Does being part of a Community change how the schools conduct EZ Scan®?

No. Being part of a Community only allows Admins to see the data. How a school conducts its EZ Scan program is not affected.

Advantages of a Community

Besides having quick and **EZ** access to aggregate data, a community also provides:

- Designate personnel at Fitness Finders® to assist the Admin and Teachers.
- Prioritized Tech Support
- Inservice Setup Assistance if desired (Zoom training)
- One expiration date for all schools
- One billing for all schools
- Community Discounts – dependent upon the number of EZ Scan subscriptions

Fitness Finders® diligently works to take care of all Teachers and tech issues. The Community Admin directs all concerns to Fitness Finders.
